Tuesday 11th January

L.O: To explore the basic needs of animals, including humans.

Flipchart- What makes you happy?

Can you complete the <u>first column</u> in your table, what makes you happy?

Let's share what we decided makes us happy :)

Move to the area of the room if you think it is a 'need' or a 'want.

Needs   Wants

ABC that response

Agree

I agree because...

Build

Building on that idea, I think...

Linking to what X said, I think...

I agree and would like to add...

Challenge

I understand your point of view, but have you thought about...

You mentioned X, but what about...

To challenge you, I think...

I disagree with you because...

Let's have a debate...

Now let's look at what makes us happy again.

Imagine you are stranded on a desert island, is it a need or a want?

Agree

I agree because...

Build

Building on that idea, I think...

Linking to what X said, I think...

I agree and would like to add...

Challenge

I understand your point of view, but have you thought about...

You mentioned X, but what about...

To challenge you, I think...

I disagree with you because...

What do animals need to survive?

What do animals need to survive?

All animals need ▢, ▢, ▢ and ▢ to survive. If those don't have all of these things, they won't survive.
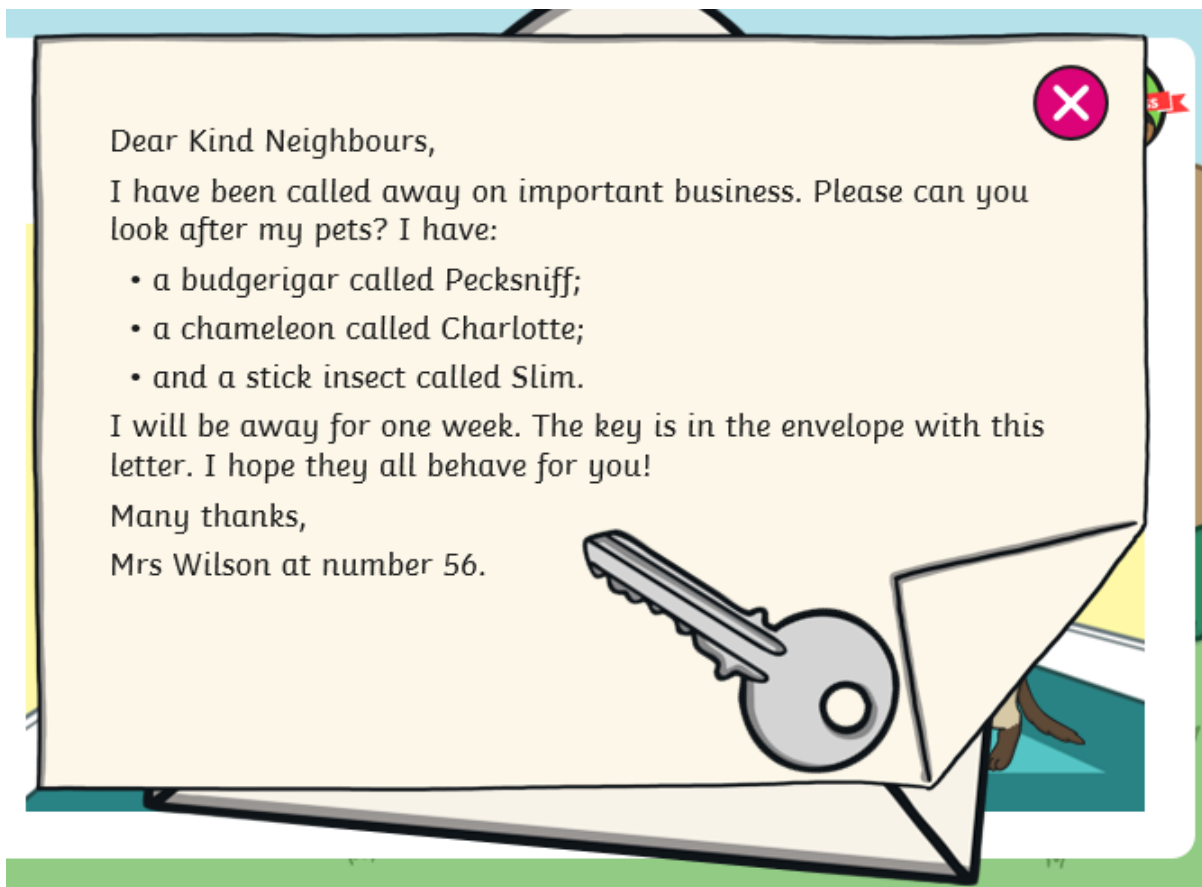

Why do you need food?

Why do you need water?

Can you complete the other columsn with your partner? Think about how the needs of pets, farm animals and wild animals might differ.

What makes me happy?	What do I need?	What does a pet need?	What does a farm animal need?	What does a wild animal need?

Dear Kind Neighbours,

I have been called away on important business. Please can you look after my pets? I have:

- a budgerigar called Pecksniff;
- a chameleon called Charlotte;
- and a stick insect called Slim.

I will be away for one week. The key is in the envelope with this letter. I hope they all behave for you!

Many thanks,

Mrs Wilson at number 56.

You task- Using the information inside the envelopes, work with your table to discuss how you will care for these three pets and how their basic needs (food, water and air) are different.

Slim

Pecksniff

Charlotte
