

The Heliocentric model of our Solar System

L.O. Understand the movement of the planets in our Solar System.

Science skills success criteria Explaining Science	Me	Teacher
I use the Heliocentric model to describe what our solar system looks like in simple language*		
I use the Heliocentric model to begin to explain how the planets move, using some complex language**		
I use the model to explain why the planets move as they do, using more complex scientific concepts and language ***		

- Label the model of the Solar System, then use it (together with what you have learnt in the lesson) to **explain** to your partner or the class how the planets move.
