

Grab one pile of objects and place them in one hand. Count the objects and write how many there are. Then, grab another pile of objects and place them in the other hand. Count the objects and write how many there are.

Can you add the two groups together and write the total in the circle?

Grab one pile of objects and place them in one hand. Count the objects and write how many there are.
Then, grab another pile of objects and place them in the other hand. Count the objects and write how many there are.
