

LO: To expand classify and use a range of generalisers and connectives

Language that helps link ideas and sentences are called connectives. They also help signal to the reader more about what we want to say.

Language that is not precise, not 100%, is called generalisers.

Connectives can be **classified** depending on the signal they give. Can you think of any?

To generalise
To add information
To show cause and effect/explain
To show similarity
To contrast
To emphasise/give opinion
To exemplify
Other complex sentence connectives

Match the examples with the classification

To generalise
To add information
To show cause and effect/explain
To show similarity
To contrast
To emphasise/give opinion
To exemplify
Other complex sentence connectives

interestingly
like
when
also
such as
almost
although
as a result

From the 'Taiga Biome' text. Identify and classify the generalisers and connectives.

Complete the sentences with one item of language.

Create your own sentence for each classification.
