

## L.O. Understand how to manipulate the sequence of a story for flashback

Today, we will work on how to best organise the sequence of events in a flashback story, but first...

... retell The Piano text, using only the actions and the symbols from the story map.

Opening (present)

As we saw previously, The Piano can be split into several parts:

Wife's Spirit

War Story

Birthday Past

Back to present

'The Piano' Bare bones
Opening introduces MC within setting. Present tense used. Something unusual happens (to 'hook' the reader)
Sequence of <b>past</b> events that reveal more about the MC. Each is <b>linked</b> to the previous. Sequenced in order (reverse, or alternatively, chronological)
 Brief return to the time frame of the opening (present tense), before continuing the sequence of past events

Return to time frame of the opening – present tense resumed
Events <b>continue</b> to bring the story to a close.

With a partner, can you re-sequence the story into the correct **chronological** order?

## chronological sequence

## chronological sequence

This is the entry point that Aidan Gibbons chose for his film. Why here?

## chronological sequence

This is the entry point that Aidan  
Gibbons chose for his film. Why here?

Think about what we had to do when we first watched the beginning of the film.

## chronological sequence

At this point, we knew nothing, but had lots of questions, which we tried to answer with just a few clues:

*How old is he? Is he married? How does he feel? Why is he playing the piano?etc.*

We then went back in time to answer the questions and find out even more about the man and his life, finishing back in the present to round off his story. This kept us interested right until the end.

There are many good stories that we already know, which fit into a simple sequence of events. Re-sequencing a story for flashback is tricky enough as it is, so we are going to use known fairy tales and change them around to re-tell them.

Your first task is to choose a fairytale and sequence it into six sections. Just write short notes about the events.

Use the class shared example to help (Three Little Pigs).

1.	2.	3.	4.	5.	6.
----	----	----	----	----	----

Now it's time to cut your story up into the individual sections.

1. **This bit's important:** choose a section of your story near the **end** which is likely to 'hook' your reader in. This is where your story will **start**.
2. The next section will now be right back at the start (box 1.)
3. The rest of the boxes follow in order, ending with box 6.

So, for example, your new story sequence might be:

5 (present tense), 1, 2, 3, 4 (past tense), 6 (return to present)

Finally, look back at the box-up sheet and transfer your notes to it.

You might want to dip back into present tense once or twice - this helps to keep the tension high (and the reader's interest).

If you're not sure about trying this on your own, follow the class shared box-up.
