

## TTYP- Two truths and a lie

### Facts about a temperate deciduous biome.

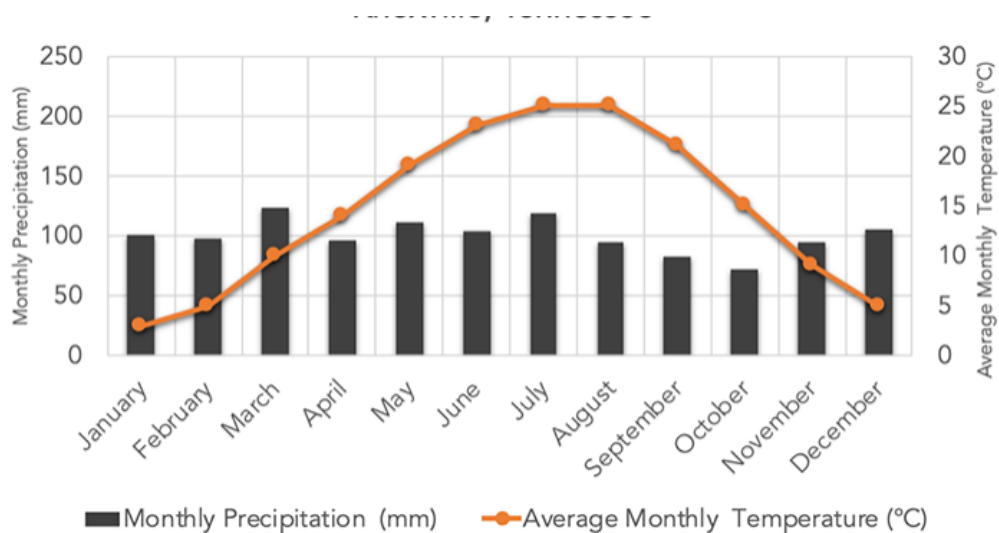

Look carefully at these three climographs.

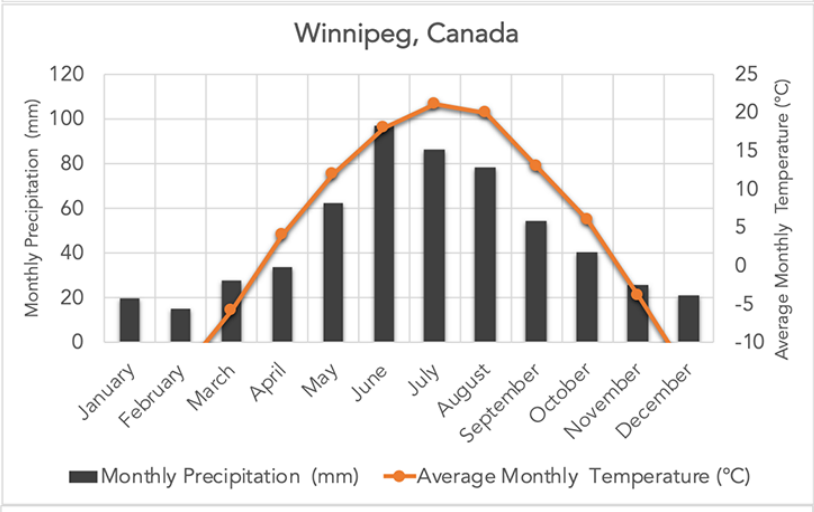

Match up the terrestrial biome with the climograph. Think about the rainfall (precipitation) and climate.

1- Tundra 2- Temperate Deciduous Forest

3- Taiga

C

L.O: To recognise the key physical features of a Chaparral biome.

Whilst we watch this video about today's biome, listen out for the 12 words on your bingo sheet and tick them off when you hear them.

Watch it a second time and make notes on your whiteboard.

Are you ready to get creative?

Your task is to create a board game on the chapperal biome and the adaptations of animals and plant.

Use the ipads to do some research and write 10 questions for your game. Think about location, climate, physical features, plants and animals (including adaptations) and human processes.

Also, think about what might cause your player to miss a turn? Go back a few space etc? E.g wildfire, suffering from heatstroke, heavy thunderstorms etc.
