

L.O. Record multiple results from a fair test

Science skills success criteria: Data, tables & graphs / Designing experiments	Me	Teacher
I use a blank frame to construct a complex table of results that includes repeat readings and I calculate the mean average with help **		
I can construct my own complex table that includes repeat readings and I calculate the mean average ***		

Independent variable (what I changed)	Dependent variable – time taken for film tub to pop (seconds).			
	Repeat 1
