

**LO: To create a 3D star**

As we won't be able to do the Crawcrook light switch on this year, the council thought it would be nice for Emmaville and St Agnes to create a star for the top of the tree.

Miss Armstrong has seen how amazing the Year 5 artists are and has chosen you for this important task.

You will each design two faces of the star. For the star we need 20 faces, 10 from St Agnes and 10 from Emmaville (Antarctica and Oceania).

First, practice your design and then do it the best you can on your card.

The 5 best from each class will be chosen for the Crawcrook tree.. The remaining faces will be used to create 3D stars for our own classroom trees.
