

1. Harry, Ron and Hermione all receive 5 house points for Gryffindor. How many points is that in total?
2. If there are 3 bananas in a bunch, and a class gets 8 bunches, how many bananas do they have?
3. There are 3 t-shirts in a pack. The pack costs £27 so how much does each t-shirt cost?
4. $36 = \square \times \square$ $24 = \square \times \square$

Which pairs of numbers could be written in the boxes? How many can you come up with?

5. Frank wants to buy some tricycles for his twin sons. How many wheels will there be?
He also wants to buy an extra set of wheels for each bike in case they get a puncture, how many wheels will there be now?
6. Will the answer to the following calculations be greater or less than 60?
 $15 \times 3 =$
 $24 \times 3 =$
 $41 \times 3 =$
 $13 \times 3 =$
7. It takes Lorna 3 minutes to swim a length of the pool. She completed a charity swim which lasts for 36 minutes, how many lengths did she swim altogether?
Her friend dad takes twice as long to swim a length (6 minutes), how many lengths did he swim?
8. Is it always, sometimes or never true that a number that is divisible by 9 is also divisible by 3?
9. $50 \times 3 = 150$.
Use this fact to work out:
 $51 \times 3 =$ $52 \times 3 =$
 $54 \times 3 =$ $55 \times 3 =$
10. $3 \times 8 = 24$
How does this fact help you to solve these calculations?
 $3 \times 80 =$
 $3 \times 40 =$
 $3 \times 16 =$
