

Highlight up to 20 important words

The tundra biome is a cold and treeless area where harsh conditions make it hard for plants and animals to survive. The word 'tundra' comes from the Finish word tunturia, which means treeless land. There are two types of tundra: actic and alpine. The arctic tundra is located within the Arctic Circle, while the alpine tundra is the area high in the mountains above the trees. Around 20% of the Earths land surface is tundra.
